

MA Links – Q4 Export Diversification Plan

Off-season product pitch: Fruits, Dry Fruits & Vegetables for Oct–Dec export window

MA Links currently exports mangoes, which peak in the summer season. The products below are recommended to diversify into the last quarter of the year (October–December), based on strong Pakistani production volume and export growth. This keeps buyer relationships active year-round instead of only during mango season.

FRUITS

Product	Season / Export Window	Why it fits
Kinnow (Citrus)	Dec – Mar (harvest starts December)	Top pick. Production 2.2–2.7M tonnes/year. 2025 exports ~\$58M; current season target \$110M, up from \$95M last year. Directly complements mango's summer season.
Guava	Aug – Dec (winter peak)	Good domestic volume; smaller but growing export presence in winter months.
Pomegranate	Aug – Nov, extends into Dec	Solid production; export demand continues into early winter.
Fresh Dates (select varieties)	Some varieties extend Sept – Nov	Pakistan is a top-5 global date producer; niche but steady demand.

DRY FRUITS

Product	Season / Export Window	Why it fits
Walnuts (Akhrot)	Oct – Dec (peak harvest)	Best dry-fruit fit for this exact quarter. Strong winter international demand.
Pine Nuts (Chilgoza)	Harvested Aug – Oct, sold through winter	High-value niche product; premium pricing in winter months.
Dried Figs (Anjeer)	Late autumn	Enters market in this window; steady winter demand.
Dried Dates / Chuhara	Year-round, demand peaks in winter	Reliable volume; can be bundled with fresh date shipments.

VEGETABLES

Product	Season / Export Window	Why it fits
Onion	Autumn crop harvested Oct – Dec	Recent export surge reported (~\$210M), largest volume opportunity among vegetables.

Product	Season / Export Window	Why it fits
Potato	Autumn crop harvested Oct – Dec	Reliable volume; export shipments typically begin in this window.

Recommended Priority Order

- 1. **Kinnow** — highest production, strongest export growth, and near-perfect seasonal fit with mango.
- 2. **Walnuts** — best-timed dry fruit for this exact quarter.
- 3. **Onion** — largest volume opportunity if MA Links wants to enter vegetables.

Note: figures are based on recent industry and trade reports (2025–2026 season) and should be reconfirmed with current TDAP/PBS data before finalizing buyer pitches.
